

Advance Care Planning Nursing Working Group

The Advance Care Planning Nursing Working Group has done a significant amount of work to move outcomes forward related to how advanced care conversations are navigated with patients. This work was initiated through a qualitative research project taken on by Heather Kilgour, Clinical Nurse Specialist at BC Cancer, as part of her Masters Degree in Nursing. Following completion of this research a knowledge mobilization grant enabled formation of a working group that developed a new approach and designed supportive resources, and created opportunities for interdisciplinary collaboration, quality improvement, and for the spread and scale this new approach to advance care planning.
